

About Us.

The Liberal Party works to promote and defend Liberal Democratic values comprising of democracy, human rights, equality, freedom of expression, property rights and market economy. For us, these are universal values that apply everywhere. And these values lie at the core of what we will work for in Lund, Region Skåne, and in the national Parliament. These values and freedoms are under threat around the world, even in Sweden, and should not be taken for granted.

The Liberal Party is Sweden's only truly pro-European party.

Can you vote in Lund on September 9? Maybe!

You do not necessarily need to be a Swedish citizen to vote in municipal and regional elections.

Citizens of EU member states, Iceland and Norway, who are legal residents of Sweden 30 days prior to the election may vote in municipal and county elections. Citizens of other countries who have been legal residents of Sweden for 3 years in succession prior to the election may also vote in municipal and regional elections.

If you have more questions about the Liberal Party or voting in Sweden, please feel free to contact us at **lund@liberalerna.se**.

Making Lund Better

Making Lund Better.

Lund is a wonderful city with everything from a unique medieval cultural heritage to a top-notch university that attracts students and researchers from around the world. Here we have an atmosphere of openness and tolerance, and an environment where ideas and knowledge thrive.

But Lund can be even better to meet a future which is characterized by increased demands for creativity and talent, and decreased distances between people and markets around the world.

To meet this future, the Liberal Party will always work for delivering high quality education, developing our infrastructure, ensuring security, and allowing personal responsibility to pay off.

The Future Starts in the Classroom.

Education is essential for success in life – it breaks down barriers and opens new opportunities. Knowledge and learning must be at the core of our education system. We will work to improve the working conditions for teachers and ensure choice in educational options, including international alternatives.

A Growing Lund.

We want to ensure that at least 1 200 new residences are built every year. It is important that we build residences that meet different housing demands, including rental properties, cooperative housing and villas. At the same time parks and recreation areas must be protected.

Openness and Tolerance.

Today, 20 % of the population of Lund have their roots in other parts of Europe and the world. The international complexion of Lund brings experience, ideas, culture and energy which enriches the city and all who live and work here. We want Lund to continue being an open and tolerant city, where different people can meet.
